2.01.18 Customerwise External Price

The mask **customerwise external price** manages the external hourly rates that are used differently from the standard rates (usually defined in the [activities](#)) for a specific customer.

The mask consist of the following elements:

- **Company:** This field indicates the corresponding contact for the changed activity records.
- **Employee:** This field identifies the employee for whom changed records exist.
- **Function:** This field indicates the employee's function for the record.
- **External Hourly Rate:** The calculation rate per hour for this employee is defined here. This rate is then used (if there is no project-related change) for quotations and invoices.
- **Note:** This field is used to enter comments on the customer-specific employee record.
