2.01.19 Address

The Address mask manages the additional addresses of a [contact](#). These additional addresses are classified by means of the address type.

Master Sheet

- **Contact:** This field assigns the address to the corresponding contact.
- **Type of Address:** This element is used to classify the address and contains the following characteristics: visitor address, billing address (for invoices), delivery address (for delivery notes) and postal address.
- **Addition Company Name:** An addition to the company name can be entered in this field.
- **Street:** The street is entered in this field.
- **Postcode/City:** In these fields, the postcode and city for the address are entered.
- **Country:** This field indicates the country.

Miscellaneous

- **int. Schlüssel:** Dieses numerische Feld kennzeichnet die Adresse eindeutig. Diese Nummer wird vom System vorgeschlagen.
- **Hauspostcode:** Dieses Feld kennzeichnet die Hauspostcodes der Adressen; beispielsweise für Industriegebiete und Technologiezentren.
