2.01.27 Goods Group

The mask **Goods Group** manages the merchandise categories as collective objects for [articles](#) in the system. These merchandise categories can be organized hierarchically, that is, each merchandise category can consist of any number of subordinate merchandise categories. The merchandise category can contain information on the vendor, commission and accounts for financial accounting, among other things.

The mask consists of the following elements:

General Data

- **Basic Information:**
 - **Number:** This field uniquely identifies the merchandise category.
 - **Name:** This field identifies the merchandise category. This identifier is used as the short description (50 characters) of the material group.
 - **Description:** This alphanumeric field identifies the material group. This description is used as the long description (255 characters).
 - **Supplier and Commission:** This field identifies the vendor of the merchandise category (usually the vendor of all articles in the merchandise category), with the corresponding commission, if applicable. The suppliers are managed in the contacts mask.
 - **Note:** Here you can enter remarks for this group.
- **Structure:**
 - **ParentGoodsGroup:** This multiple selection contains all superior material groups (for example product groups).
 - **SubsGoodsGroup:** This multiple selection contains all subordinate material groups.
- **Items:** This multiple selection contains all articles in this merchandise category. The articles are managed in the [Article](#) mask and can be assigned to the merchandise categories here.

Misc

- **Value Added Tax:** In this field the sales tax for the articles of the merchandise category from the selection menu is entered. The sales tax can be defined and changed in the [sales tax](#) mask.
- **CostAccount and ProfitAccount:** Here you can define the expense and revenue account for postings.
