The form consists of the following elements:

On the “Main” tab:

- **Number:** The element “Number” specifies distinctly the sales pipeline in System.
- **Date:** This field specifies the compilation/start date of the sales pipeline.
- **Customer:** This field assigns the corresponding contact to the sales pipeline.
- **Employee:** This field specifies the publisher of the sales pipeline. The employee can be defined and modified in the document type Employee.
- **Reference:** The customer's, in the Collections (see Administration Guide) defined references (e.g. training, workshops, etc), can be assigned in the field Reference.
- **Potential:** The in the Collections (see Administration Guide) defined gradation, regarding the quality of the business contact (e.g. A-contact, B-contact or C-contact) can be stored in the field Potential.
- **Need for Action:** The in the Collections (see Administration Guide) defined gradation, regarding the need for action (e.g. low, significant or mandatory) can be stored in the field need for action.
- **Sales Phase:** The in the Collections (see Administration Guide) defined distribution phase(e.g. first contact, qualified contact, information material, presentation, offer, etc.) can be stored in the field distribution phase.

- **Offer:** The offer of the sales pipeline can (e.g. starting from the distribution phase “Offer”) be assigned here.
- **Sales Probability:** The offer probability of the distribution activity is stored here.
- **Incoming Order:** The time of the probable incoming order of the distribution activity is stored here.
- **Work/Effort in Hours:** In service projects the potential work/input in hours can be stored here.
- **Hourly Rate:** The potential hourly rate with service products can be stored here.
- **Calculated Order Value:** In service projects this value is the product of the work/input in hours and the hourly rate.
- **Order Value:** The potential order value of the distribution activity is stored (or calculated) here. In the example, an order of EUR 40.000,00 to the possibility of 75% is calculated in the beginning of February 2009.
- **Budget:** The total budget of the distribution activity is stored here.
- **Comment:** Comments concerning the sales pipeline can be entered here.
- **Decision-Board:** As many decision-makers as needed, including their settings for the sales pipeline, can be stored here. These persons and their settings can be defined in the document decision-maker.

The screenshot shows the 'Projektanlage' tab in the 'Verkaufstrichter 17 CONSULT AG' application. The form is divided into several sections:

- Projektname:** A text field containing 'Baugebiet Mombacher Kreisel'.
- Unit:** A dropdown menu showing '010 Nürnberg'.
- Projektmanager:** A table with columns 'Name' and 'Vorname'. It contains one entry: '1' in the first column, 'Abel' in the second, and 'Klaus' in the third.
- Priorität:** A dropdown menu showing '3 - normale Priorität'.
- Projektzeitraum:** Two date fields labeled 'von' and 'bis'. The 'von' field is '01.03.2009' and the 'bis' field is '31.05.2009'.

On the “Project Fields ” tab:

- **Project Name:** This field identifies the upcoming project.
- **Unit:** In this field the responsible unit for the upcoming project is specified (usually a location or a department. Units can be modified in the **Unit** form.
- **Project Manager:** This field specifies the potential project manager for the upcoming project.
- **Priority:** This field specifies the priority of the potential project.
- **Project Time Span from/to:** The field “from” defines the prospective project begin and the field “to” defines the prospective project end of the potential project.
