## 2.01.19 Address

The **Address** form administers additional addresses from Contact. The additional addresses are classified with help of type of address.

**Tip:** For more on this subject see chapter [3.11.04 The Contact System](#).

|                                    |                                    |
|------------------------------------|------------------------------------|
| Address 7 Invoice Address          |                                    |
| Document Edit View Back references |                                    |
| Address                            | 7                                  |
| Customer                           | TLC Telecommunications Corporation |
| Street                             | Kensington High Street             |
| Address line                       | Postal code: W8 4 City: London     |
| Country                            | Great Britain                      |
| Address code                       |                                    |
| Address type                       | Invoice Address                    |

The form consists of the following elements:

- **Address:** This element designates distinctly the address in System.
- **Customer:** This field assigns the associated contact to the address.
- **Street:** The street is entered in this field.
- **Address Postal Code/City:** The postal code and the city for the address is entered in this field.
- **Country:** This field specifies the country.
- **Address code:** This field specifies the house post code of the address; e.g. for industrial parks and technology centers.
- **Address type:** This element is used to classify the address and consists of the characteristics visitor's address, commercial invoice address, delivery address and postal address.
