2.02.08 State (Degree of Completion)

The **State** form allows assigning key data/figures for the project's progress. This data can be used for any report date. The project status is determined from the difference of the target/performance comparison to the degree of completion of a project.

Tip: For more on this subject see chapter [4.2.07 Estimations](#).

The document type consists of the following elements:

- **Number:** This alphanumerical field specifies a unique number for the degree of completion.
- **Project:** In this field the respective project is selected, to which an estimation regarding the degree of completion is made. The projects can be defined and modified in the project form.
- **Report Date:** This field specifies the report date, to which the estimation regarding the degree of completion is made. This field is automatically occupied with the current date from the system.
- **Completion:** The field degree of completion specifies the estimated project's degree of completion in percent, on the respective report date.
- **Employee:** This field specifies the employee, who estimated the degree of completion. Employees can be administered in the employee form.
- **Comments:** This field is designated for comments concerning the degree of completion.
