2.02.08 Budget

The **Budget** form administers the project-related budgets in the system. Here, a budgetary item can be defined through any cost type for a project. Internal budgets (cost estimates/planned costs) and/or external budgets (items, which should be charged project-related, e.g. travel expenses or commuting expenses) can also be defined. These budgetary items are compared with the recorded costs in the system as the basis for various target/performance comparisons.

The screenshot shows the 'Budget 160-2 Projectile Standard Version' form. The 'Master data' tab is active. The form contains the following fields and values:

- Number:** 160-2
- Description:** Projectile Standard Version
- Cost:** Real costs
- Project:** 160 Introduction Projectile
- Supplier:** Information Desire Software Gm
- Timespan:** From 15.02.2012 To 27.03.2012
- Budget (internal):** 4.000,00 EUR
- Budget (external):** 5.900,00 EUR
- Budget difference:** 1.900,00 EUR
- Note:** (Empty text area)
- Receipts:** No entries
- CostReceiptTracked:** 290,00 EUR

The form consists of the following elements:

On the “Master data” tab:

- **Budget/Number** In the field budget and number a unique number is assigned to the budgetary item. The field number is also editable after creating the budgetary item.
- **Description:** This field specifies the description of the budgetary item.
- **Cost Type:** This field defines the type of cost for the defined budgetary item. These cost types are compared later with the recorded costs within the frame of the target/performance comparisons and can be defined and modified in the types of cost form.
- **Project:** This field defines the project, to which the defined budgetary item belongs. A budgetary item can be assigned to a parent/main project as well as a sub-project. The projects

can be defined and modified in the project form.

- **Supplier:** This field specifies the supplier for the defined budget. When incoming invoices (external invoice) are recorded for this project, the system matches the amounts with the budget (and gives a warning when budget is exceeded).
- **Begin:** The field begin specifies the beginning for the validity of the budgetary items. When selecting a project, this field is pre-selected with the beginning of the assigned project.
- **End:** The field end specifies the end for the validity of the budgetary items. When selecting a project, this field is pre-selected with the end of the assigned project.
- **Internal Budget:** This field defines the internal budget (the cost objective/estimate) (Kostenvorgabe) for the selected budgetary item.
- **External Budget:** This field defines the external budget (the amounts, which should be charged (weiterbelastet) project-related) for the selected budgetary items. These external budgets are entered into the plan-revenue of the project and can be transferred to the offer.
- **Budget Difference:** This field calculates the difference between the internal and external budget.
- **Comment:** This field is designated for comments concerning the budgetary items.

The screenshot shows a software window titled "Budget 160-2 Projectile Standard Version". The interface includes a menu bar with "Document", "Edit", "View", "Back references", and "Actions". Below the menu is a tabbed interface with "Master data" and "Misc" tabs. The "Misc" tab is selected, displaying several input fields:

- Budget:** A text box containing "106-2".
- Number of deductions:** A text box containing "1" with a green checkmark icon to its right.
- Amount2:** A text box containing "1" with a green checkmark icon to its right.
- Amount3:** A text box containing "1" with a green checkmark icon to its right.
- Item:** A dropdown menu showing "Projectile Basis Projectile Basis" with a green checkmark icon to its right.
- OrderPosition:** A dropdown menu with a green checkmark icon to its right.
- Price per unit:** A text box containing "5.900,00" followed by "EUR".

On the "Misc" tab:

- **Amount, External Service:** The amount and the type of external services can be entered here, if the budgetary items are related to the external services (for example databases, hardware, ...). After clicking the green checkmark/tickmark, the system defines the internal and external budget from the purchase price and the sales prices of the external service.
