2.02.11 Project-based Employee Rates

The project-based employee rate administers the occupation rates, which are adjusted for a defined project. When these rates are defined for a project or sub-project, these values override the global employee rates (see also costing and pricing).

Tip: For more on this subject see chapter [4.1.05 Tätigkeiten](#).

The menu consists of the following elements:

- **Project:** This field specifies the corresponding project.
- **Employee:** This field specifies the employee, for whom the project is adjusted. Changes made here, do not change the original employee rate.
- **Function:** This field is pre-occupied with the function of the employee and can be changed for the defined project.
- **External Hourly Rate:** The charge/cost rate (Berechnungssatz) are defined here. This is then used when billing the customer for this project.
- **Comments:** This field is designated for comments.
