2.11.01 Mail System "Mailer"

Projectile contains, in the optional groupware module, internal and external mail functionality. Using the integrated mail system “Mailer”, e-mails and short messages (SMS) can be sent within the system. The internal e-mails can be directly linked to any document in the system and can generate automatic messages as templates (see also [Contact System](#)) or reminders for appointments (see also [Team-Calender](#)). Furthermore, the mail system is integrated in the contact system and the employee administration.

Tip: For more on this subject see chapter [3.04.1 Mailsystem Mailer](#)
