2.11.01 Mail System "Mailer"

Projectile contains, in the optional groupware module, internal and external mail functionality. Using the integrated mail system "Mailer", e-mails and short messages (SMS) can be sent within the system. The internal e-mails can be directly linked to any document in the system and can generate automatic messages as templates (see also [Contact System](#)) or reminders for appointments (see also [Team-Calendar](#)). Furthermore, the mail system is integrated in the contact system and the employee administration.

Tip: For more on this subject see chapter [3.04.1 Mailsystem Mailer](#)

The screenshot displays the 'Mailer' application window. On the left is a sidebar with a folder tree containing 'DRAFTS (0/0)', 'INBOX (0/7)', 'SCHEDULED (1/1)', and 'SENT (0/3)'. The main area is divided into several sections: a toolbar with icons for sending, deleting, and other actions; a header section with 'Timestamp' (09.10.2009 14:51:49), a 'Read' checkbox, and 'Attachments'; a 'Sender' field with 'Conner Jane'; fields for 'InternalRecipients' and 'ExternalRecipients'; a 'Scheduled' section with a date/time picker (09.10.2009 12:45:00); and a 'Subject' field with 'Action 1-5 Williams George Meeting'. Below these is a large 'Body' text area containing 'Action 1.1-2 Timothy Jones'. At the bottom, there is a 'References' section with a list item 'Action 1-5 Williams George Meeting'.
