## 2.11.02 Document Administration "Flyer"

Projectile contains, in the optional groupware module, an integrated document administration functionality. Using the document administration, directory structures can be created, as well as files created and administered on the web server. The document administration contains a personal folder and project folder. Access permission is required for usage in the complete folder structure.

Tip: For more on this subject see chapter [3.04.2 Document Administration "Files"](#)
