# 2.13 Knowledge and Information Management System "Infomarket"

Projectile contains optionally a web-based information system for knowledge management. Every user can enter and add information and/or articles in the infomarket. For regular usage the system does not need moderators or editors.

The infomarket can be accessed through the search form, which also displays the favorite and newest information. Either, information can be linked to or a term can be entered into the search machine.

The screenshot shows the Infomarket web interface. At the top, there is a search bar with a magnifying glass icon and a dropdown menu for 'QueryMode' set to 'ANY'. Below the search bar, there are 'Total Statistics' showing 3 KeyWords, 4 InfoNodes, and 5 SoftLinks. A 'QueryCategories' dropdown is also visible. The main content area is divided into three columns: 'Favourite key words', 'Latest key words', and 'News board'. The 'Favourite key words' list includes terms like Projectile, Project Management, Project EP, Java, Information Desire, Project Portfolio Management, Backup, MySQL Tuning, TimeTracker Administration, SQL old table modify, CMS, and Capacity planning. The 'Latest key words' list includes Projectile, Project Management, Java, Project EP, Information Desire, Backup, Project Portfolio Management, MySQL Tuning, CSM, Capacity planning, TimeTracker Administration, and SQL old table modify. The 'News board' shows a post for 'Projectile' dated 23.05.2011.

Favourite key words	Latest key words	News board
Projectile	Projectile 07.05.2012	<a href="#">Projectile</a> 23.05.2011
Project Management	Project Management 14.10.2010	
Project EP	Java 05.10.2010	
Java	Project EP 07.05.2012	
Information Desire	Information Desire 14.10.2010	
Project Portfolio Management	Backup 05.10.2010	
Backup	Project Portfolio Management 07.05.2012	
MySQL Tuning	MySQL Tuning 14.10.2010	
TimeTracker Administration	CSM 05.10.2010	
SQL old table modify	Capacity planning 07.05.2012	
CMS	TimeTracker Administration 14.10.2010	
Capacity planning	SQL old table modify 05.10.2010	

In the following example, all direct and indirect information regarding Projectile is listed. The information becomes the basis for "knowledge" through connections. Infomarket has hard link and soft link connections.

In the example above, the words project management and Information Desire are hard links, which either link to another entry in infomarket or request another user to contribute information to this entry. The URL (www.infodesire.com) and the link to a Projectile document (Project EP) are hard links as well, and do not reference to direct information in infomarket, but to a homepage and a project document in the system.

The terms on the right side (Project EP, Project Portfolio Management, Project Management, Information Desire) are soft links and specify information, which were called from the current entry.

As with the human brain, connections which are used more often are more emphasised. I.e., these connections are listed higher to the top of the link list and are easier to find.
