2.06.07 Lock Time Tracking

With the function “lock time tracking” a definite date can be set as the limit for entering data retrospectively for any employee. The date of the limited retrospective data entry is interpreted, including the entered day and overrides, if applicable, the settings in the TimeTracker configuration script, where the central rules for the retrospectively entered data are stored.

Time tracking limit

End: 09.10.2009
