3.02.04 Alternative Work Areas

Projectile offers the user up to eleven intro screens. The first screen is the standard screen, the second intro screen is the module view and all further views can be configured by the user.

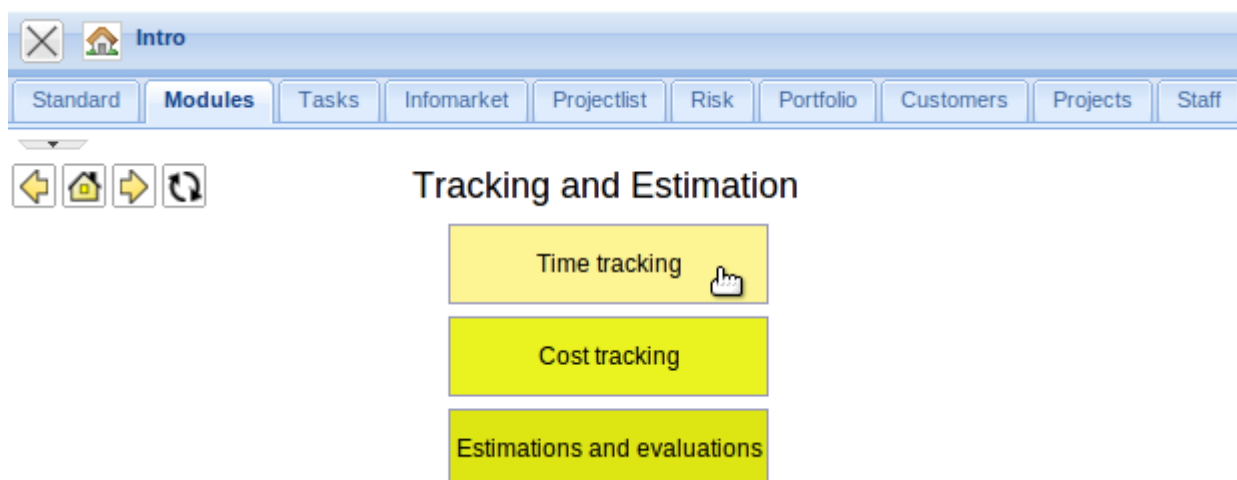

Besides the standard view, the module view is also provided. In this view all available functionalities (which are dependent on the access permissions) are displayed as processes. This view is opened through clicking the tab.

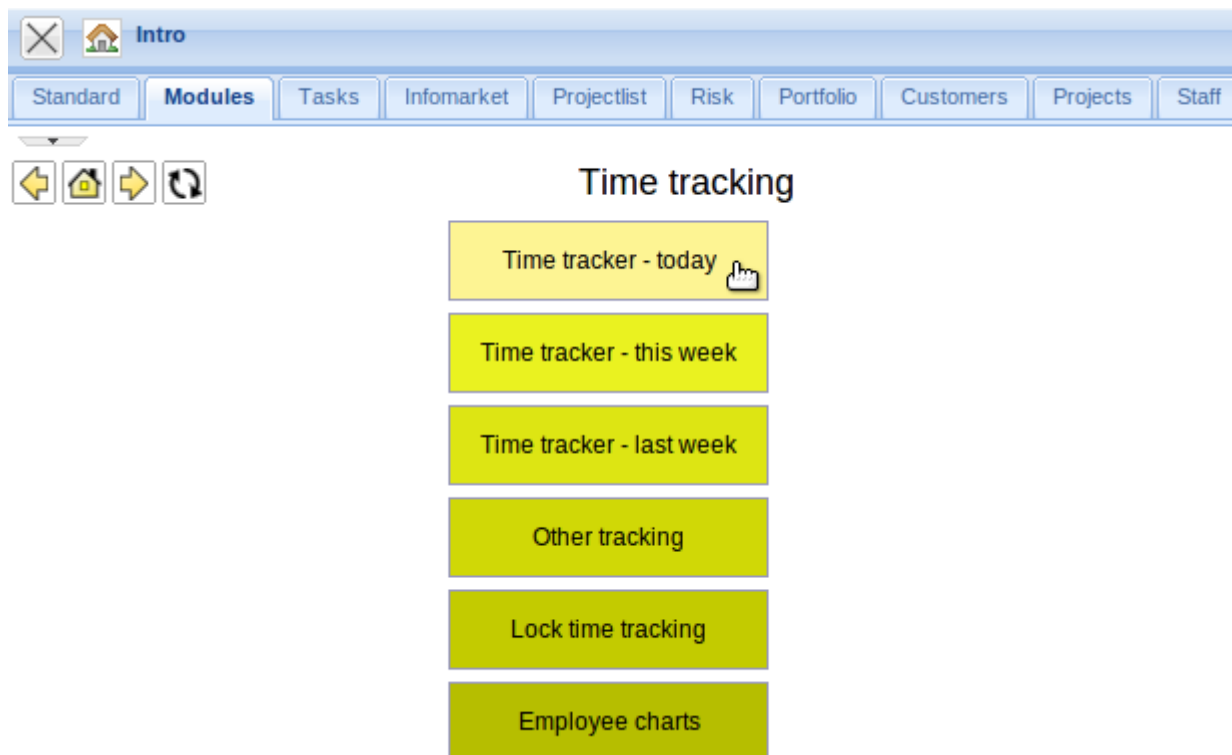

The application can then be used by clicking on the element in the process overview. In the example, the user changes to the “tracking and estimation” view ...

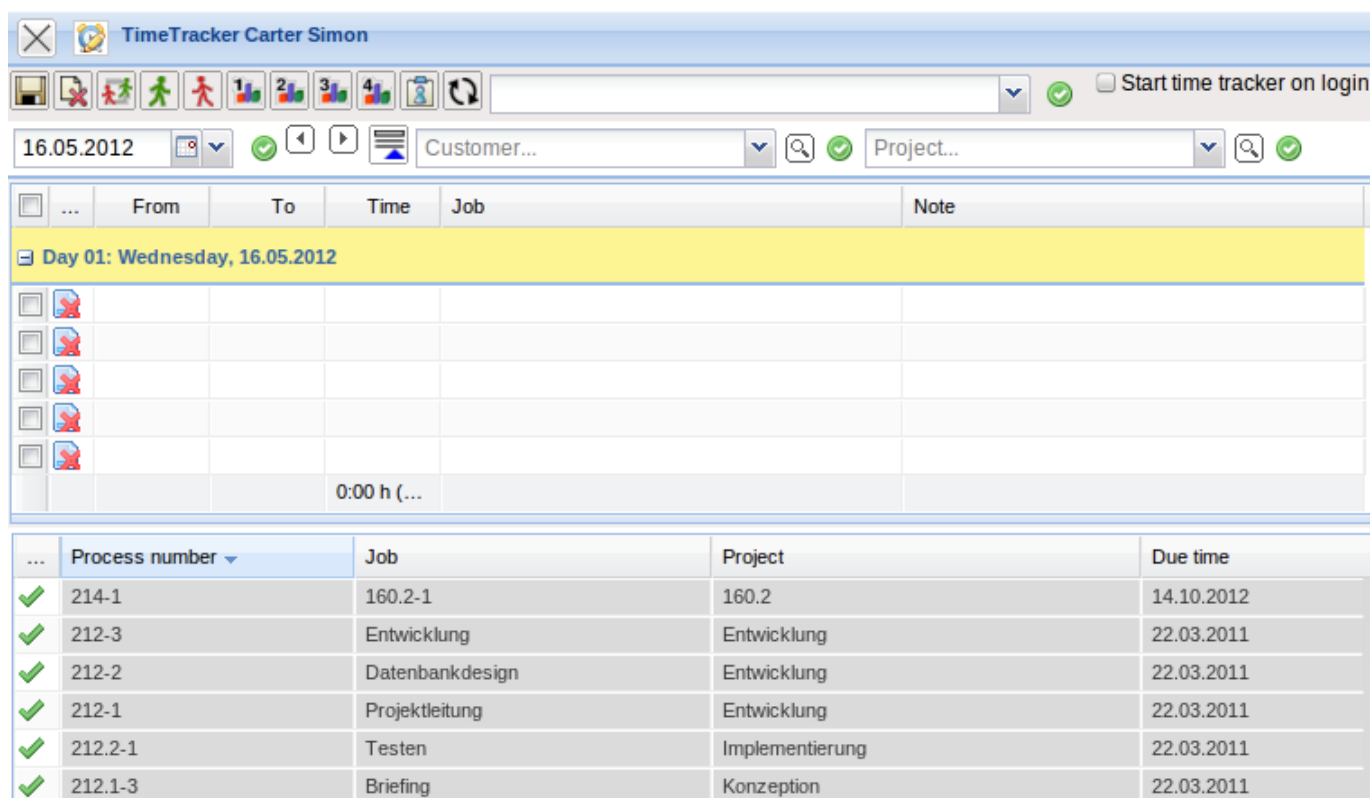

... and to the module "Time tracking" and then ...

in the functionality "Time tracker - today".

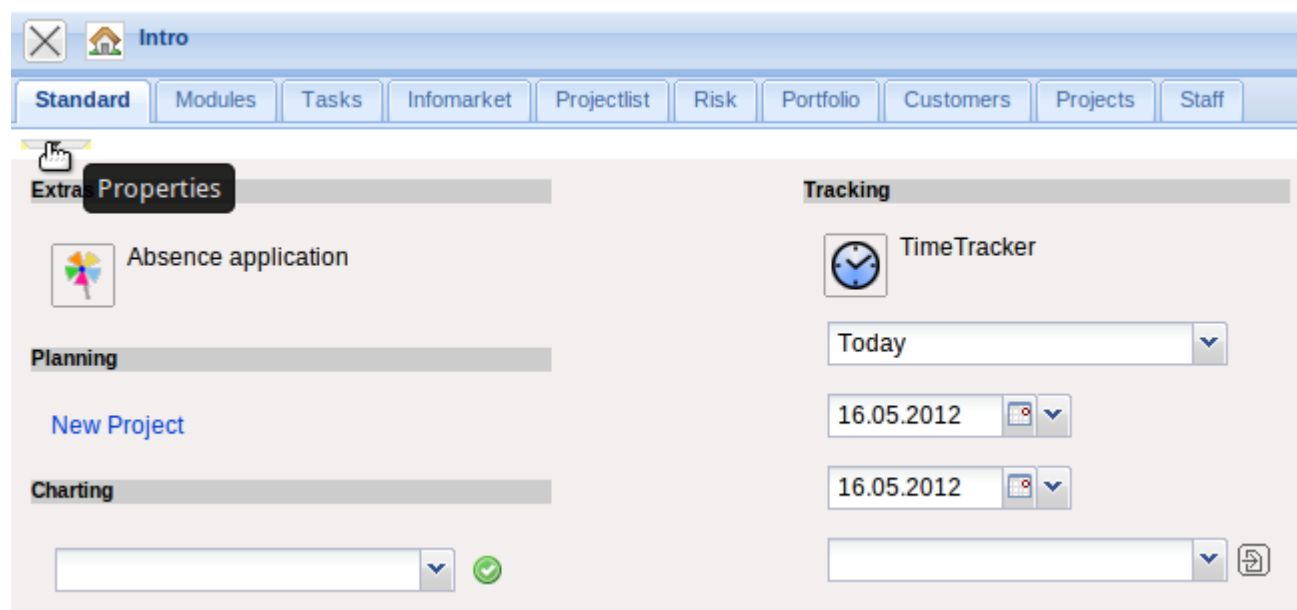

The TimeTracker opens to the current date:

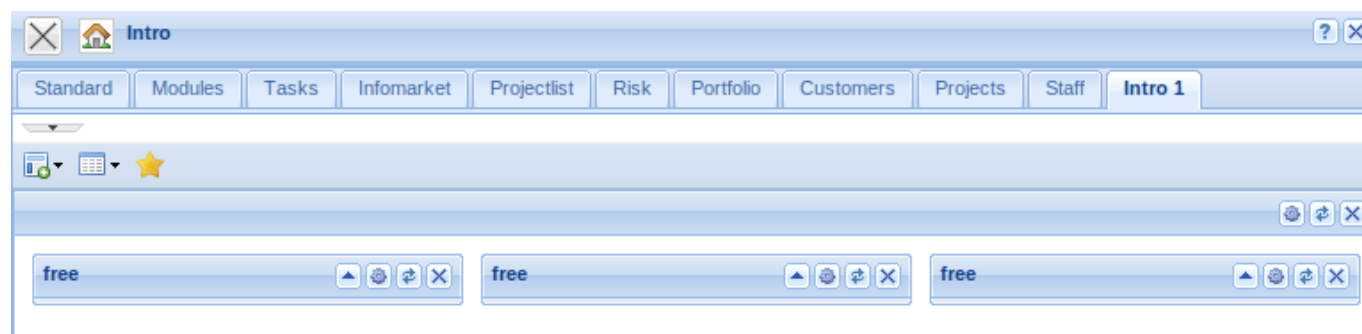

Intro Screens Set-Up

Using the option "My Intro" each user can directly access all important overviews and reports generated from the user. The intro screens can be configured through the properties function. Here, various intro screens can be named and the plug-ins can be added. In the current Projectile version, various personalized intro screens and further functionalities for these intro screens are available, for

example, for appointments (including actions, milestones and jobs) and queries from advanced search (Profi-Suche).

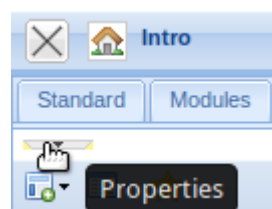

In the beginning, the empty intros look like the following:

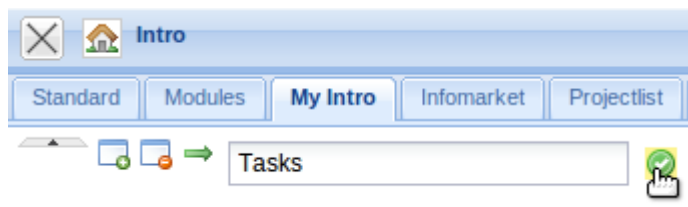

Design-Modus

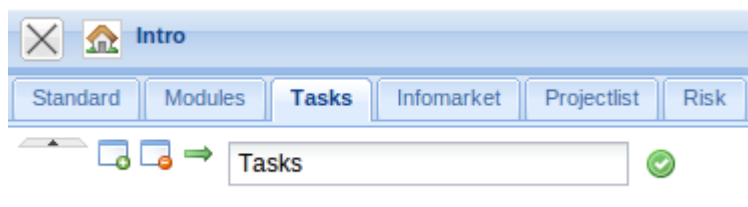

The individual intros can be configured. Change to the tab to be configured and then click the “properties” button:

The name can then be changed ...

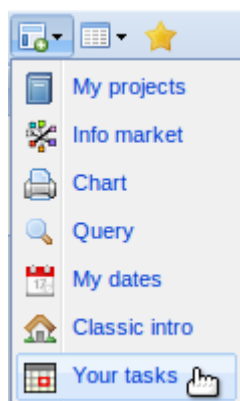

... and the entry is included after clicking the green check mark.

Adding Contents

In the lower part of the intros, contents can be defined, which can then be displayed. Predefined forms as My projects, Your tasks, My dates and the modules Info market and Classic intro can be selected.

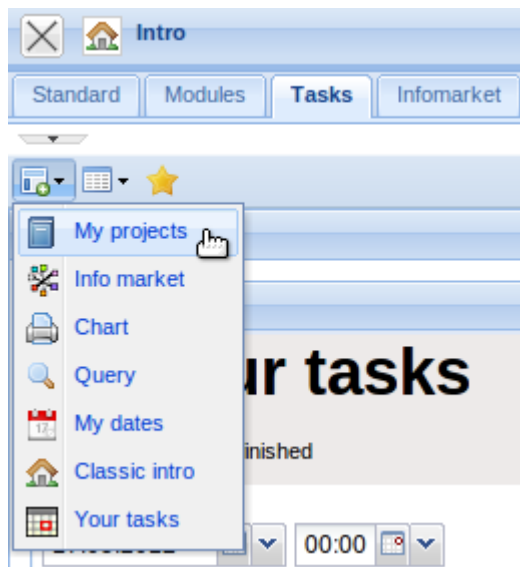

Selecting an entry, for example, "Your tasks" ...

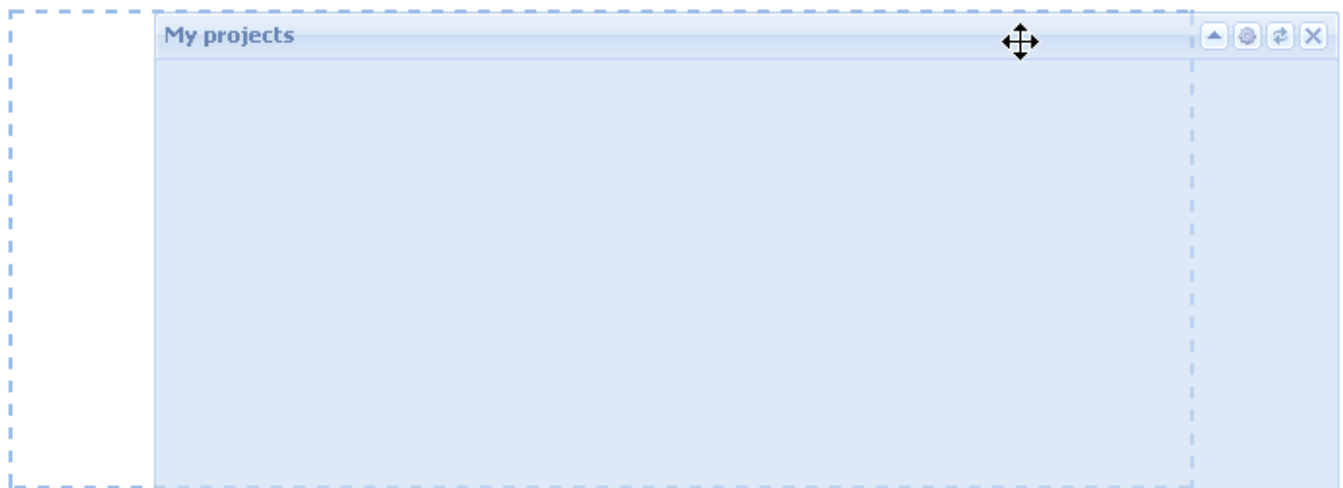

the form is displayed on the left column:

The My project form is added here.

This can be moved per Drag&Drop ...

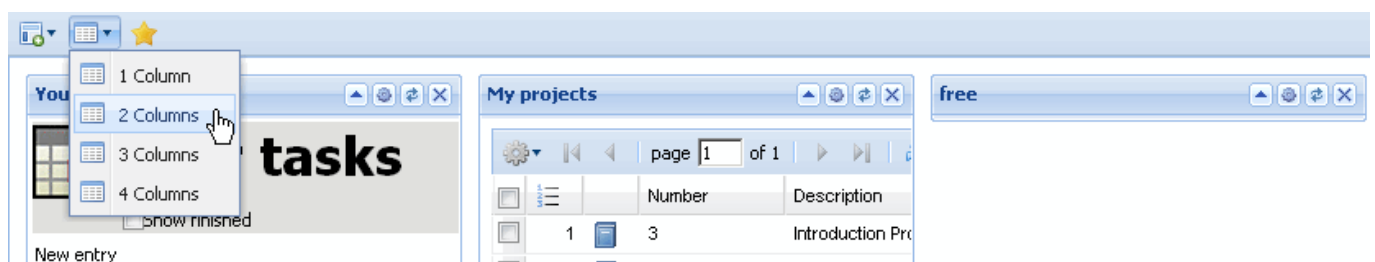

to a different area ...

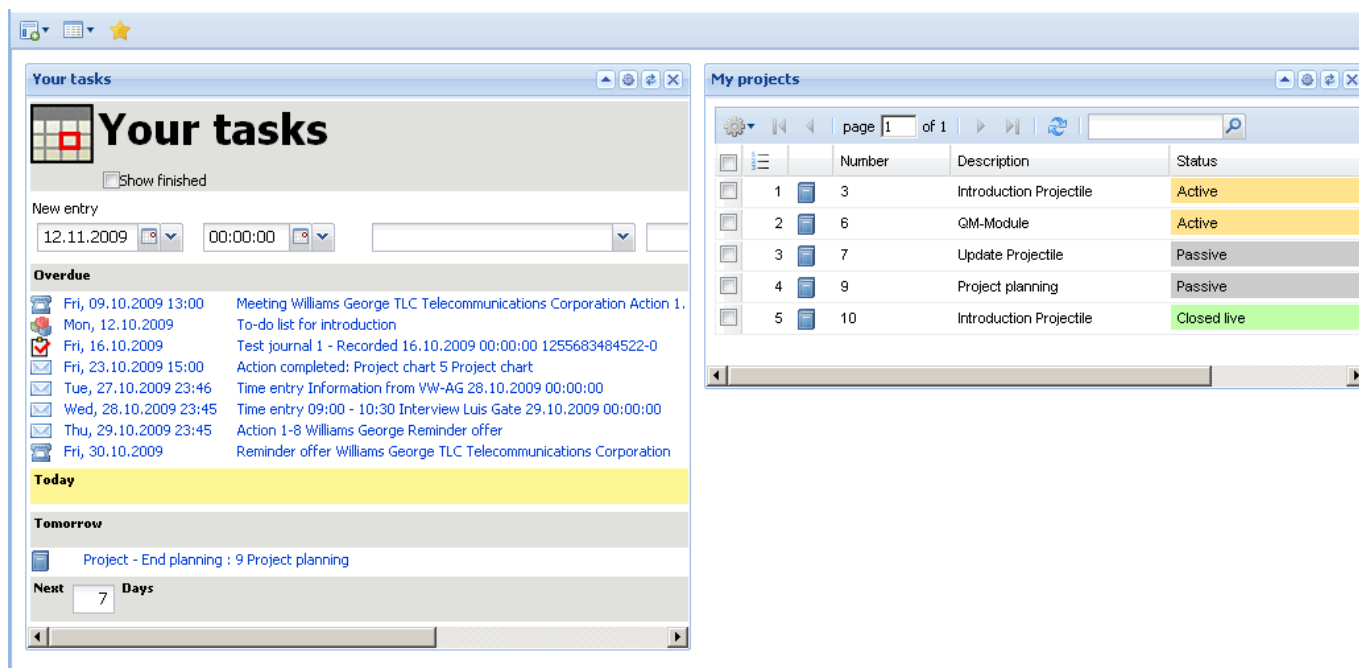

Possible Settings

The 2nd button on the lower toolbar defined the amount of columns which should be displayed.

By changing the columns from 3 to 2, the view changes the existing modules:

Your tasks

Adding Charts

On the intro screens, charts can be displayed. In the configuration of the intro screen, “Chart” can be selected in the menu bar.

An empty chart screen is then displayed on the left.

Settings

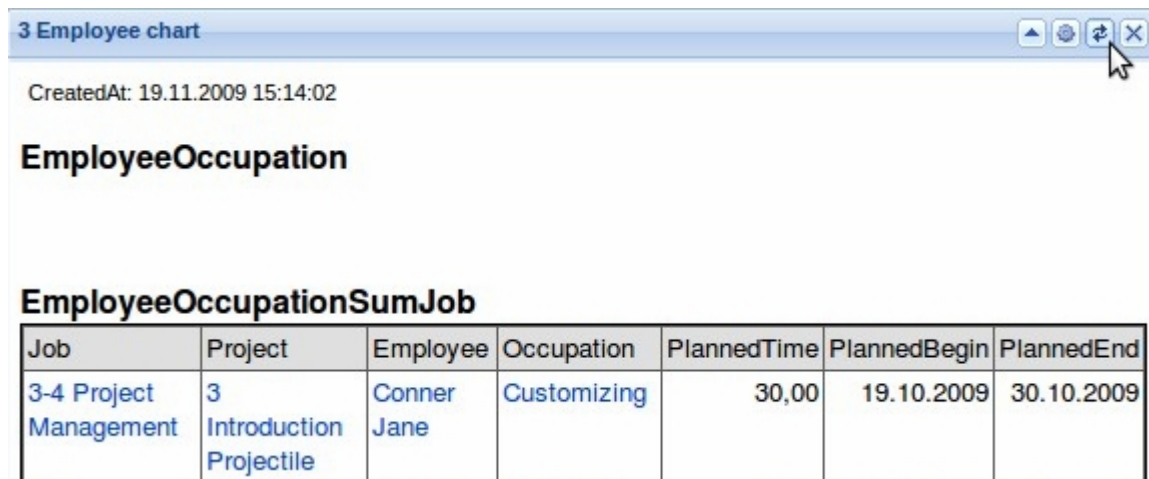

Click on the gear wheel symbol on the screen at the right ...

... shows the chart configuration screen again.

A screenshot of the "3 Employee chart" configuration screen. The window has a title bar with "Intro" and a tabbed interface with tabs labeled "Standard", "Module", "Intro 1", "Intro 2", "Intro 3", "Intro 4" (selected), "Intro 5", "Intro 6", "Intro 7", and "Intro 8". Below the tabs, there are icons for a document, a calendar, and a star. The main content area is titled "3 Employee chart" and contains several sections: "Perform now" (with sub-links "Planned execution" and "Show last result"), "Perform in background" (with sub-link "Change chart"), "Chart" (with a dropdown menu showing "02 - Time confirmation"), "Chart period" (with a dropdown menu showing "Current month"), "Idql" (with a dropdown menu), "Quick search" (with a text input field), "Category" (with a dropdown menu showing "Employee"), and "Input data" (with a table showing two rows of employee data). The table has columns for a checkbox, a number, an employee icon, and the employee name. The first row shows "1" and "Employee Conner Jane", and the second row shows "2" and "Employee Tate Adam".
