3.02.5 Search and Find

The search engine finds searched data. Through entering a search string in the quick search field (here, Projectile) and clicking the magnifying glass, the complete data pool can be searched using this string.

Since a query search can take some time to search all the data in the system, an appropriate warning is displayed.

The following illustration displays a possible return list in the search query: In the return list all documents are listed, in which the defined search string "Projectile" exists.

These return lists can be changed for further usage ...

Collection [Edit file](#) [Report](#)

page 1 of 10 show 20 entries

Type	Description	State
1 TimeTracking	19.10.2009 5	
2 TimeTracking	20.10.2009 3-3	

.. and saved ("Projectile Query").

[Save the document](#)

Name ID 125810578891: Description Query 'Projectile'

Entries

page 1 of 2 show 100 entries 1 - 100 / 182

Type	Description	State
1 TimeTracking	19.10.2009 5	
2 TimeTracking	20.10.2009 3-3	

In the result set, the back and forward button and/or jump to first or last document can be found in the navigation bar. In the example, a result list of 294 entries are displayed, where the first 20 documents (1-20) are visible. Clicking the small triangle in the navigation bar ...

Using the function `show 20 entries` further 20 results can be displayed (i.e. 40 after the first click). Using the functionality once again `show 20 entries` further 20 results per result list are displayed. Accordingly, the functionality `show 5 entries` reduces the amount of results in the result list.

... are displayed. Clicking a link in this result list (here, Projekt EP Einführung Projectile) ...

The screenshot shows the Projectile software interface. At the top, there is a navigation bar with various icons and a search bar. The search bar contains the text 'project' and a dropdown menu is open, showing 'Job' and 'Search'. Below the navigation bar, there is a section titled 'Collection Query for Job 'project''. This section contains a table with 16 rows, each representing a project entry. The table has columns for 'Process number', 'Description', and 'Closed'. The 'Closed' column shows dates for some entries, such as '15.06.2009' and '20.10.2009'. The table is sorted by 'Process number'.
