3.02.5 Search and Find

The search engine finds searched data. Through entering a search string in the quick search field (here, Projectile) and clicking the magnifying glass, the complete data pool can be searched using this string.

Since a query search can take some time to search all the data in the system, an appropriate warning is displayed.

The following illustration displays a possible return list in the search query: In the return list all documents are listed, in which the defined search string "Projectile" exists.

These return lists can be changed for further usage ...

The screenshot shows the 'Collection Query 'Projectile'' interface. At the top, there are buttons for 'Collection', 'Edit file', and 'Report'. Below these is a navigation bar with 'page 1 of 10', 'show 20 entries', and a search icon. The main area contains a table with the following data:

	Type	Description	State
1	TimeTracking	19.10.2009 5	
2	TimeTracking	20.10.2009 3-3	

.. and saved ("Projectile Query").

The screenshot shows the 'Collection Query 'Projectile'' interface. At the top, there are buttons for 'Document', 'Edit', 'View', and 'Actions'. Below these is a 'Save the document' button. The main area contains a form with 'Name' and 'ID' fields, and a 'Description' field. Below the form is a table with the following data:

Type	Description	State
TimeTracking	19.10.2009 5	
TimeTracking	20.10.2009 3-3	

In the result set, the back and forward button and/or jump to first or last document can be found in the navigation bar. In the example, a result list of 294 entries are displayed, where the first 20 documents (1-20) are visible. Clicking the small triangle in the navigation bar ...

The screenshot shows the 'Collection Query 'Projectile'' interface. At the top, there are buttons for 'Document', 'Edit', 'View', 'Back references', and 'Actions'. Below these is a 'next page' button. The main area contains a form with 'Name' and 'ID' fields, and a 'Description' field. Below the form is a table with the following data:

Type	Description	State
TimeTracking	19.10.2009 5	
TimeTracking	20.10.2009 3-3	

... displays the next documents 21-60 automatically.

26	Todo	Test jour	ed 16.10.2009 00:00:00 125568 1 - Recorded
27	Todo	To-do 2.4	1 - Recorded 28.08.2009 12:00:00 12553590 1 - Recorded

Using the function `show 20 entries` further 20 results can be displayed (i.e. 40 after the first click). Using the functionality once again `show 20 entries` further 20 results per result list are displayed. Accordingly, the functionality `show 5 entries` reduces the amount of results in the result list.

... are displayed. Clicking a link in this result list (here, Projekt EP Einführung Projectile) ...
