3.02.05 Search and Find

The search engine finds searched data. Through entering a search string in the quick search field (here, Projectile) and clicking the magnifying glass, the complete data pool can be searched using this string.

Since a query search can take some time to search all the data in the system, an appropriate warning is displayed.

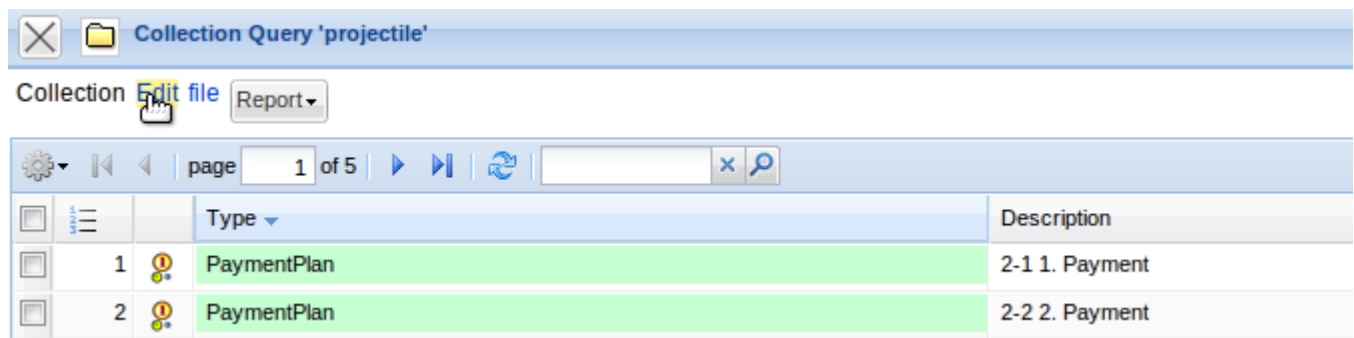

The following illustration displays a possible return list in the search query: In the return list all documents are listed, in which the defined search string "Projectile" exists.

 A screenshot of the 'Collection Query 'projectile'' window. It shows a list of 17 search results. The table has columns for 'Type', 'Description', and 'State'. The results are as follows:

Type	Description	State
PaymentPlan	2-1 1. Payment	
PaymentPlan	2-2 2. Payment	
PaymentPlan	2-3 3. Payment	
Payment	CS-12-04-14 16.04.2012 30.04.2012	
Process	10-1 Installation Projectile	0
Process	144-2 Handbuch	0
Process	144-3 Antesten Testsystem	0
Process	162-1-1 Conception for combining Projectile and SAP CO/FI	0
Process	3-13 Projectile-Version	1
Process	EP-1 Projektleitung	1
Process	EP-2 Test AA	0
Process	EP-3 AA Ticketsystem Erweiterung	0
Contract position	2-1 Projectile +5	
Contract	Indroduction Projectile	
SalesPipeline	1	
SalesPipeline	10 LOL AG	
SalesPipeline	12 Reifenhändler	

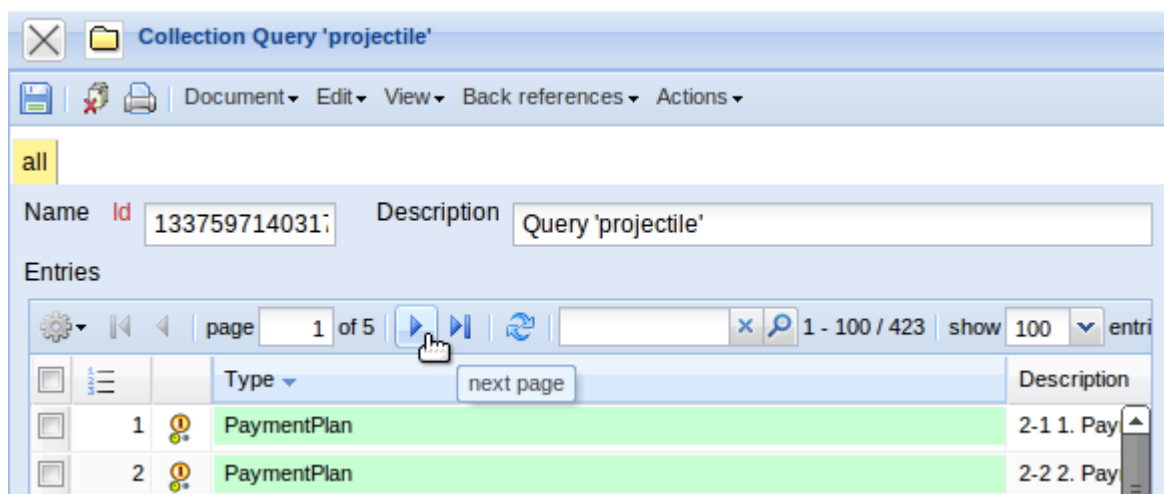

These return lists can be changed for further usage ...

... and saved ("Projectile Query").

In the result set, the back and forward button and/or jump to first or last document can be found in the navigation bar. In the example, a result list of 294 entries are displayed, where the first 20 documents (1-20) are visible. Clicking the small triangle in the navigation bar ...

... displays the next documents 21-60 automatically.

The screenshot shows a web application interface for a 'Collection Query 'projectile''. At the top, there is a toolbar with icons for document, edit, view, back references, and actions. Below the toolbar, the 'all' filter is selected. The main section displays a table of entries with columns for Name, Id, and Description. The 'Id' field contains the value '133759714031'. The 'Description' field contains the text 'Query 'projectile''. Below the table, there is a pagination bar showing 'page 1 of 5' and a 'show' dropdown menu. The 'show' dropdown menu is open, displaying a list of options: 5, 10, 20, 50, 100, 200, 500, 1000, 5000. The option '50' is highlighted with a red box and a mouse cursor icon. The table itself contains 8 entries, each with a checkbox, a number, a status icon, and a type name. The types are 'PaymentPlan' (green), 'Payment' (orange), and 'Process' (yellow).

Name	Id	Description
	133759714031	Query 'projectile'

checkbox	1	2	3	4	5	6	7	8	Type
☐	1								PaymentPlan
☐	2								PaymentPlan
☐	3								PaymentPlan
☐	4								Payment
☐	5								Process
☐	6								Process
☐	7								Process
☐	8								Process

Using the function `show 20 entries` further 20 results can be displayed (i.e. 40 after the first click).

Using the functionality once again `show 20 entries` further 20 results per result list are displayed.

Accordingly, the functionality `show 5 entries` reduces the amount of results in the result list.

... are displayed. Clicking a link in this result list (here, Projekt EP Einführung Projectile) ...
