Elements for Multiple Selections:

If several entries can be assigned to field content, multiple selections are used. The fields of multiple selections consist of a central button for all editing functions (removal/delete, cut and paste, create new document, create report...) and the search window for the full-text search.

Project team

		Name	First name	EmployeeStatus
1		Adoro	Luca	Fixed
2		Carter	Simon	Fixed
3		Chavez	Marc	External
4		Dominguez	Jose	Fixed
5		Miles	Sarah	Fixed
6		Thomá	Miriam	Fixed

These elements contain generally also the following functionalities:

A multiple selection is either automatically defined by the system functionalities or manually. A system functionality of this kind is for example the project team in the document project. All issuers (persons in charge) of the jobs are automatically transferred here. An example for the manual

definition is the basis for the skill management of Projectile: Assigning occupations to the employees.

By clicking on the magnifying glass in the field occupations, a dialog is opened...

... with all defined occupations in the system.

 Current selection: Professional skills

Hint: It is also possible to click on entries to include them
