3.04.1 Mailsystem "Mailer" (Continued)

Short-Messages

The mail system can also send short messages. These messages appear directly in the system, They can not include links and can not be opened through the work area. Otherwise, the usage is analog to the e-mails.

In the following example a short message is created with .

A new short message is opened.

In this message, the recipient will be (here, by using the address book) and ...

... the text of the short message entered. By using the functionality "Send Mail" this message is sent to the recipient (here Julia Mueller) and ...

... a sending report is created.

In the workarea of projectile for the user Julia Mueller, the message will appear at the next action in the system.

Analog to the answering of the mails, the short message can be either deleted, can be marked as read with the text message, or it can be answered on the text message.

Integration of the Mail System

In the contact system, you can use for each contact or contact person either the email link or the mail functionality. The link to the email address ...

Checked ☐

If the optional component Mailer is used, the system generates a reminder notification on the day and of the time for this action automatically ...

... with the appropriate link. The system also creates an entry in the personal calendar (Your tasks).

If the optional component group-calendar is used, this action appears in the group-organizer (here, as an appointment for Peter Schaub on 02.01.2007) and can be opened from here.
