3 %	13-C	100,00

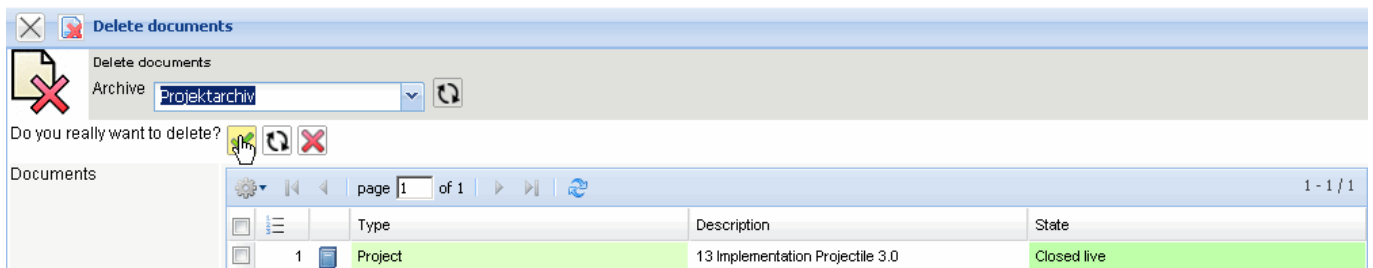

... will delete it.

Before the document is deleted, a dialog appears; asking if the document should be deleted.

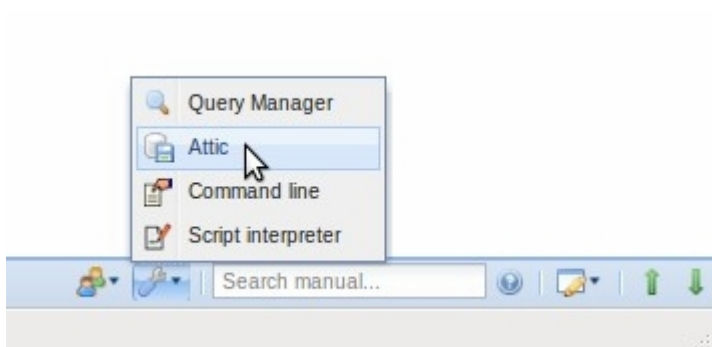

This dialogue is a security precaution, since the deletion can be undone only by selected users (see also recycle bin / Archive). If the project is deleted, it can be restored from the recycle bin. Analogically the archiving also functions for future restoring of projects or of other data pool.

In the following example, the project 13 Implementation Projectile 3.0 is moved to the project archive. This process may take some time for larger structures.

With the functionality  the recycle bin or the archive can be accessed.

In the search dialog you can enter a search text, or a document type, date of deletion and the sort order.

In the example you can search for all projects in the project archive, which have been deleted after 01.12.2009

The system finds three archived projects (the top project 13 and the two sub-projects of the project 13).
