3.09 Workflow-Module

The workflow engine enables illustrating work processes within Projectile. Unlike a business process that describes a sequence of activities with the objective of service performance, a workflow is a predefined sequence of computer-aided flow of activities. The workflow engine in Projectile supports a business process, provided with necessary data and processes, according to the specifications stored in the system. The goal here is not a documentation for an organization or its employees, but rather the ability to automate the process.

Projectile's workflow engine is based on OSWorkflow from OpenSymphony and is part of the standard version.

Implementations example "Absence application"

In TimeTracker various workflows for the handling time periods (period-end closing, vacation application, ...) can be stored. The following example shows the implementation of a holiday application. After performing the action in the Time Tracker ...

The screenshot shows the 'TimeTracker Timothy Jones' application window. At the top, there is a toolbar with various icons and a search bar. Below the toolbar, a date '20.10.2009' is displayed. A dropdown menu is open, showing a list of actions: '01 - conclude last month and apply for approval of', '02 - conclude current month and apply for approval of', and 'Apply for holiday'. The 'Apply for holiday' option is highlighted by the mouse cursor. Below the menu, a table displays time tracking data for 'Tuesday, 20.10.2009'. The table has columns for 'From', 'To', 'Time', and 'Job'. The data rows show time intervals and corresponding job descriptions. At the bottom left, a summary shows '9:30 h' and '4:10 h'.

From	To	Time	Job
08:00	14:40	6:40 h	Come and leave
10:30	13:47	3:17 h	3-3 Programming 4-3 - 3 Introduction Projectile
13:47	14:40	0:53 h	3-2 Installation Projectile - 3 Introduction Projectile
15:10	18:00	2:50 h	Come and leave
Σ		9:30 h	4:10 h

... a dialog for absence application is opened. Here the user can apply for absences (overtime compensation, recreation and special vacation) and cancel absences applied for or cancel approved absences.

The applicant obtains a message of the vote from the system.

Depending on the voting results, the holiday is graphically displayed as vacation or as vacation rejected in the absence application of the Time Tracker.
