3.09 Workflow-Module

The workflow engine enables illustrating work processes within Projectile. Unlike a business process that describes a sequence of activities with the objective of service performance, a workflow is a predefined sequence of computer-aided flow of activities. The workflow engine in Projectile supports a business process, provided with necessary data and processes, according to the specifications stored in the system. The goal here is not a documentation for an organization or its employees, but rather the ability to automate the process.

Projectile's workflow engine is based on OSWorkflow from OpenSymphony and is part of the standard version.

Implementations example "Absence application"

In TimeTracker various workflows for the handling time periods (period-end closing, vacation application, ...) can be stored. The following example shows the implementation of a holiday application. After performing the action in the Time Tracker ...

The screenshot shows the TimeTracker application window for user Timothy Jones. The interface includes a top toolbar with icons for various functions. Below the toolbar, there is a date field set to 20.10.2009 and a search bar. A dropdown menu is open, showing a list of actions: '01 - conclude last month and apply for approval of', '02 - conclude current month and apply for approval of', and 'Apply for holiday'. The 'Apply for holiday' option is highlighted by the mouse. Below the dropdown, there is a table with columns for 'From', 'To', 'Time', 'Job', 'Cost unit', and 'Note'. The table contains several rows of data, including time intervals and job descriptions. At the bottom, there is a summary row showing a total of 9:30 h and 4:10 h.

From	To	Time	Job	Cost unit	Note
Tuesday, 20.10.2009					
08:00	14:40	6:40 h	Come and leave		Come in
10:30	13:47	3:17 h	3-3 Programming 4-3 - 3 Introduction Projectile		Programming from Introduction Consult
13:47	14:40	0:53 h	3-2 Installation Projectile - 3 Introduction Projectile		Installation from Projectile
15:10	18:00	2:50 h	Come and leave		Go out
Σ 9:30 h			4:10 h		

... a dialog for absence application is opened. Here the user can apply for absences (overtime compensation, recreation and special vacation) and cancel absences applied for or cancel approved absences.

The applicant obtains a message of the vote from the system.

Depending on the voting results, the holiday is graphically displayed as vacation or as vacation rejected in the absence application of the Time Tracker.
