3.11.05 Occupation Administration (Customer-related Occupations) (Continued 1)

Using customer-related occupations, the customer-related cost rates on the basis of the [occupations](#) can be defined. The cost rates of the [customer-related occupations](#) are directly defined through "customer".

Note: The customer-related occupations override the occupations, but have a lower priority than the project-related occupations.

Using the action "create customer-related occupation", the functionality is called and ...

... a new overview of all occupations is opened. All entries which should be explicitly customized for this customer can be selected here.

Customer	John Green Ltd.
Occupation	Programming - MS SQL
Description	Programming - MS SQL
Hourly rate	115,00 EUR
Hourly internal cost rate	65,00 EUR
Note	

After modifying the last occupation, the dialog "customer-related occupations" is saved.

The occupations for a customer can be displayed and modified ...

The screenshot shows the 'Customer John Green Ltd.' master data screen. The 'Actions' dropdown menu is open, displaying various options such as 'Print letter', 'Create customer-related external prices', 'Create customer-related occupations', 'Display customer-related external prices', 'Display customer-related occupations' (which is highlighted), 'ExportVCard', 'MakeCustomerwiseTicket', and 'ShowContactManager'. The main data entry fields include 'Customer' (Contact number 5), 'Company name' (John Green Ltd.), 'Old Name' (empty), 'Organization' (Category: Customer, Type: Firm), and 'Parent customer' (empty). A sub-table for 'Sub customers' shows one entry: 'John Green & Co. Ltd' at '200 Lower Parliament Street' with 'Postal code' 'NG1 1EE' and 'City' 'Nottingham'.

... using the action "display customer-related occupation".

The screenshot shows the 'Collection 25.11.2009 16:02:20' screen. The 'Report' tab is selected. The table lists two entries under 'Occupation': 'Occupation Programming - MS SQL' and 'Occupation Programming - XML'. The second entry has a cursor pointing to its 'Occupation' column.

	Customer	Occupation

Job 2-2 Programming Projectile 2.7

Date	Netto Cost	Netto Source	Brutto Cost	Brutto Source
14.09.2009 - 25.11.2009	60,00	Occupation Programming - MS SQL		

Hourly rate (external) = 115,00 as stated in Customerwise occupation John Green Ltd. Programming - MS SQL

Note: These rates are not valid if a global cost rate exists or project-related occupations are defined. The global cost rates may be stored in **project**, **customer** or **employee** and override all the occupation rates. The project-related occupations override (if any) also the customer-related rates, so that exceptions can be illustrated for individual projects.
