# **3.06 Reportgenerator "ReportMaker"** (continued 5)

# **Key Figures**

#### Definition:

Key figures are consolidated values, which are calculated using algorithms from the document data or other key figures, and which describe a document. An ID as a unique identification is assigned for each key figure. Projectile supports key figures for the forms contact, project, jobs and employee.

The use of key figures in Projectile allows the user to create total values, values for any point in time and values for any time period. The values which are created by key figures are marked with a creation date, so that they can be stored and reused without a re-calculation. Furthermore, each key figure can be assigned to a document, and can be integrated by key figures in the screen views and in reports.

#### Usage:

After a project, a job or an employee has been chosen by using the search function in Projectile, clicking on "Report" opens the Report-Designer. Here are the key figures in the column "column content", where they are identified by an asterisk. After one or several key figures have been selected, it is necessary to select '(periods)' in the same column. Then, a time interval should be defined for the key figures. Select the "time interval" in the drop down box, for example "current month", and then select a period, for example, "weekly". Additionally, the creation of new key figures for a defined period of time can be blocked by using the "Max figures age".

Afterwards an aggregate type for forming sums for the key figures. In the row of the key figure, in the drop down box "Periodic", select either "Total" = the entire static value including the non-visible values, "periodic" = the timed limit of the total value, "sum" = the sum of the visible values and "accumulated" = the sum of the periodical determined values.

After clicking save, go back to the dialog field, and also click save, an output format is selected and "Show Reports" is clicked. The report with the key figures is generated and is available for further usage.

**Customer Form:** 

| Name                             | Description  | Туре  | SubTyp | ID                                 | Standard<br>yes/no |
|----------------------------------|--|-------|--------|------------------------------------|--------------------|
| Incoming<br>Invoice              | Incoming invoice<br>amount of the<br>contact, the sum of<br>the contact, sum of<br>the incoming invoice<br>positions, which refer<br>to the contact, Limit:<br>date of the incoming<br>invoice   |       |        | IncomingInvoice_Tracked_Customer   | yes                |
| Offer Tracked                    | The basis of these<br>key figures is the<br>data of the offer. The<br>net amounts of the<br>offer values of all<br>projects of the<br>customer with the<br>status "offer<br>included" are<br>calculated here.<br>When limited, the<br>date of offer is used.                               |       | MONEY  | Offer_Tracked_Customer             | yes                |
| Order Value                      | The order value of<br>the supplier, sum of<br>the order positions<br>which refer to the<br>supplier (gross<br>amount), Limit: date<br>of order   | FLOAT |        | OrderValue_Tracked_Customer        | yes                |
| Order<br>Confirmation<br>Tracked | The basis of these<br>key figures is the<br>data of the order<br>confirmation. The net<br>amounts of the<br>orders of all projects<br>of the customer with<br>the status "offer<br>confirmation<br>included" are<br>calculated here.<br>When limited, the<br>date of the order is<br>used. |       | MONEY  | OrderConfirmation_Tracked_Customer | yes                |

| Name                     | Description  | Туре  | SubTyp | ID                             | Standard<br>yes/no |
|--------------------------|--|-------|--------|--------------------------------|--------------------|
| Profitability<br>Tracked | Profitability =<br>(revenue - costs) /<br>revenue, revenue is<br>the actual revenue<br>and is estimated for<br>fixed price projects<br>based on the degree<br>of completion. Basis<br>of this calculation<br>should not be the<br>"pure" recorded<br>time, but should be<br>calculated in<br>percentage - in<br>relation to the daily<br>working times of 8<br>hours. In the<br>evaluation of fixed-<br>price projects with<br>the aid of the degree<br>of completion, the<br>true revenue is<br>considered only with<br>the final bill (fixed<br>price or amount of<br>payment invoices =<br>100%). For all other<br>states (complete<br><100%), the fixed<br>price (orders, if filled<br>- otherwise offer<br>value when filled -<br>otherwise plan<br>revenue after adding<br>surcharges) is used<br>and this value is<br>multiplied with the<br>degree of completion<br>/ 100. |       |        | Profitability_Tracked_Customer | yes                |
| Estimated<br>Sales       | Order value in the<br>sales pipeline<br>multiplied with the<br>probability   | FLOAT | MONEY  | Sales_Estimated_Customer       | yes                |
| Planned<br>Sales         | Planned order value,<br>order value in the<br>sales pipeline   | FLOAT | MONEY  | Sales_Planned_Customer         | yes                |

| Name                 | Description  | Туре  | SubTyp | ID                                | Standard<br>yes/no |
|----------------------|--|-------|--------|-----------------------------------|--------------------|
| Supplier<br>Budget   | Sum of the budgets<br>of the order<br>positions, which<br>belong to the order<br>of the suppliers.<br>Budgets have no<br>fixed date, but<br>margin, overlapping<br>charge  | FLOAT |        | SupplierBudget_Tracked_Customer   | yes                |
| Supplier<br>Turnover | Sum of the incoming<br>invoice positions,<br>which refer to the<br>project and are<br>included into the<br>outgoing invoices.  | FLOAT |        | SupplierTurnover_Tracked_Customer | yes                |
| Time Billed          | Billed effort/time<br>from included job<br>times, the time limit<br>is based on the date<br>entries of the billed<br>time entries  | FLOAT | MONEY  | Time_Billed_Customer              | yes                |
| Turnover<br>Tracked  | The basis of these<br>key figures is the<br>data of the invoice.<br>The net amounts of<br>the invoice amounts<br>of all projects of the<br>customer with the<br>status "offer<br>confirmation<br>included" are<br>calculated here.<br>When limited (if<br>existent), the time<br>span of the service,<br>otherwise the date of<br>the invoice is used. | FLOAT | MONEY  | Turnover_Tracked_Customer         | yes                |

## **Project Form:**

| Budget External<br>Tracked | Total ext.<br>amounts of all<br>budgets of the<br>project, Span:<br>fully or partially<br>overlapping |      |        | BudgetExternal_Tracked_Project | yes                |

| Name                   | Description  | Туре  | SubTyp | ID                               | Standard<br>yes/no |
|------------------------|--|-------|--------|----------------------------------|--------------------|
| BudgetInternalTracked  | Total internal<br>amounts of all<br>budgets of the<br>project, Span:<br>fully or partially<br>overlapping                      | FLOAT |        | BudgetInternal_Tracked_Project   | yes                |
| Planned Material Costs | Total ext.<br>amounts<br>material cost-<br>Budget of the<br>project  | FLOAT |        | BudgetMaterial_Tracked_Project   | no                 |
| Remaining Cost         | Remaining<br>budget on the<br>basis of the<br>difference of<br>actual time and<br>target time,<br>also external<br>hourly rate | FLOAT | MONEY  | RemainingCost_Calculated_Project | no                 |
| Budget Third Party     | Total ext.<br>amounts FL-<br>Budgets of a<br>project   | FLOAT |        | BudgetThirdParty_Tracked_Project | no                 |
| Planned Travel Cost    | Total ext.<br>amounts travel<br>cost budgets of<br>the project   | FLOAT |        | BudgetTravel_Tracked_Project     | no                 |

| Name                  | Description   | Туре  | SubTyp | ID                            | Standard<br>yes/no |
|-----------------------|---|-------|--------|-------------------------------|--------------------|
| Completion Calculated | Degree of<br>completion by<br>calculation, not<br>based on<br>estimates, but<br>purely on the<br>basis of plan<br>and actual. The<br>basis of this<br>key figure is<br>the quotient of<br>actual and<br>planned time<br>or (if available)<br>the final<br>employee<br>estimate less<br>the thereafter<br>recorded<br>services. This<br>data is<br>determined for<br>each job and<br>condensed to<br>the projects.<br>When defining<br>the time span,<br>either the plan<br>and actual time<br>or the<br>estimates of<br>the jobs are<br>used on a daily<br>basis. | FLOAT |        | Completion_Calculated_Project | yes                |

| Name                             | Description  | Туре  | SubTyp | ID                                   | Standard<br>yes/no |
|----------------------------------|--|-------|--------|--------------------------------------|--------------------|
| Completion Employee<br>Estimated | Key Figure:<br>Degree of<br>completion by<br>employee<br>estimate, i.e.<br>estimates from<br>TT. The basis<br>of this figure is<br>the tracking<br>and recording<br>system<br>TimeTracker<br>and the<br>estimate<br>completion<br>dialog. Here,<br>the remaining<br>time and/or<br>degree of<br>completion for<br>jobs are<br>entered by the<br>employee and,<br>if necessary,<br>corrected by<br>the project<br>manager in the<br>dialog<br>"estimate<br>completion".<br>When defining<br>the time span,<br>the estimates<br>are used per<br>day. | FLOAT |        | Completion_EmployeeEstimated_Project | yes                |
| Completion Manager<br>Estimated  | Key Figure:<br>Degree of<br>completion<br>through the<br>manager's<br>estimate, i.e.<br>from the states<br>documents,<br>which depends<br>directly on the<br>project. The<br>basis of this<br>key figure is<br>the degree of<br>completion of<br>the project.<br>When defining<br>the time span,<br>the estimates<br>per deadline<br>are used.   |       |        | Completion_ManagerEstimated_Project  | yes                |

| Name                  | Description  | Туре  | SubTyp | ID                           | Standard<br>yes/no |
|-----------------------|--|-------|--------|------------------------------|--------------------|
| Cost Normalized       | This key figure<br>calculates<br>analogue to<br>the key figure<br>Work Cost<br>Tracked*<br>(project form),<br>which<br>multiplies the<br>recorded<br>actual time<br>with the<br>internal hourly<br>rate of the<br>employee.<br>Basis of the<br>calculation is<br>not the "pure"<br>recorded time,<br>but the<br>calculation of<br>costs are in<br>percentage - in<br>relation to the<br>daily working<br>times of 8<br>hours. The<br>time span is<br>the date<br>entries of the<br>time recording. | FLOAT | MONEY  | Cost_Normalized_Project      | yes                |
| Cost Material Tracked | Total ext.<br>amount of the<br>costs   | FLOAT |        | CostMaterial_Tracked_Project | no                 |
| Misc Cost Tracked     | Total ext. other<br>amounts of the<br>costs  |       |        | CostOther_Tracked_Project    | no                 |

| Name                          | Description   | Туре  | SubTyp | ID                                | Standard<br>yes/no |
|-------------------------------|---|-------|--------|-----------------------------------|--------------------|
| Cost Performance<br>Estimated | The CPI (Cost<br>Performance<br>Index) is the<br>cost-related<br>performance<br>key figure of<br>Earned Value<br>Analysis. It is<br>formed from<br>the ratio of<br>earned value<br>and actual<br>time. This<br>means that<br>with a CPI of<br>greater than<br>1.00 (100%)<br>the project<br>results are<br>rendered at a<br>lower cost than<br>originally<br>planned, while<br>a value of less<br>than 1.00<br>(100%)<br>exceeds the<br>project's<br>budget.<br>Calculation:<br>Planned time *<br>degree of<br>completion /<br>actual time<br>spent | FLOAT |        | CostPerformance_Estimated_Project | yes                |
| Planned Cost Total            | Total planned<br>costs on the<br>basis of jobs<br>and budgets,<br>internal costs  | FLOAT | MONEY  | Cost_Planned_Project              | yes                |

| Name                        | Description  | Туре  | SubTyp | ID                             | Standard<br>yes/no |
|-----------------------------|--|-------|--------|--------------------------------|--------------------|
| Cost Tracked                | Internal job<br>costs + costs<br>from cost<br>documents,<br>such as<br>receipts,<br>driving, travel<br>The basis of<br>this key figure<br>is the tracking<br>and recording<br>entries (Time<br>Tracker) and<br>the cost<br>recording<br>(drive, receipt,<br>travel, foreign<br>costs and<br>foreign<br>invoices). Here,<br>the work cost<br>tracked* and<br>all internal<br>costs (net<br>amounts) of<br>the entries for<br>driving,<br>receipts, travel,<br>foreign costs<br>and foreign<br>invoices are<br>totaled. When<br>defining a time<br>span, the<br>recorded time<br>and cost<br>receipts are<br>used per day. | FLOAT | MONEY  | Cost_Tracked_Project           | yes                |
| Cost Third Party<br>Tracked | Total ext.<br>amounts of the<br>costs  | FLOAT |        | CostThirdParty_Tracked_Project | no                 |
| Travel Cost Tracked         | Total ext.<br>amounts of the<br>costs  | FLOAT |        | CostTravel_Tracked_Project     | no                 |
| End Tracked                 | Key figure: end<br>of time<br>tracking, last<br>time at which<br>something has<br>been recorded<br>for a project,<br>whether time,<br>receipts, travel,<br>travel, etc.  | DATE  |        | End_Tracked_Project            | no                 |

| Name                 | Description   | Туре  | SubTyp | ID                                 | Standard<br>yes/no |
|----------------------|---|-------|--------|------------------------------------|--------------------|
| Incoming Invoice     | Incoming<br>invoice of the<br>project, the<br>total of the<br>incoming<br>invoice position<br>items that<br>reference the<br>project, Time<br>span: the date<br>of the incoming<br>invoice  |       |        | IncomingInvoice_Tracked_Project    | yes                |
| Incoming Invoice Net | Incoming<br>invoice of the<br>project, the<br>total of the<br>invoice position<br>items, which<br>reference the<br>project (net),<br>Time span:<br>Date of<br>incoming<br>invoice   | FLOAT |        | IncomingInvoiceNet_Tracked_Project | yes                |
| Turnover Chargeable  | All billable<br>times<br>multiplied by<br>the hourly<br>rates, i.e., job<br>times which<br>can be billed in<br>invoices. The<br>basis of this<br>key figure is<br>the key figure<br>"Chargeable<br>Time*". This<br>key figure is<br>multiplied with<br>the external<br>hourly rate of<br>the job (see<br>pricing). When<br>defining the<br>time span, the<br>the time<br>recording are<br>used per day. | FLOAT | MONEY  | Turnover_Chargeable_Project        | yes                |

| Name                 | Description   | Туре  | SubTyp | ID                          | Standard<br>yes/no |
|----------------------|---|-------|--------|-----------------------------|--------------------|
| Job Turnover Tracked | The basis of<br>this key figure<br>is the data of<br>the invoice.<br>Here the net<br>amounts of the<br>position items<br>are calculated<br>based on jobs<br>of the project<br>with the status<br>"Invoice<br>included". If<br>the time span<br>is defined, the<br>performance<br>period is used,<br>otherwise the<br>invoice date is<br>used. | FLOAT | MONEY  | JobTurnover_Tracked_Project | yes                |
| Misc Cost Tracked    | All costs except<br>work costs:<br>item sales,<br>trips, travel,<br>receipts, Time<br>span: Date<br>entris of the<br>cost<br>documents  |       | MONEY  | MiscCost_Tracked_Project    | yes                |
| Offer Value          | The basis of<br>this key figure<br>is the data of<br>the offer. Here,<br>the net<br>amounts of the<br>offer value of<br>the project<br>with status<br>"Offer<br>included" are<br>calculated.<br>When defining<br>the time span,<br>the date of the<br>offer is used.  | FLOAT | MONEY  | Offer_Tracked_Project       | yes                |

| Name                                   | Description  | Туре  | SubTyp | ID                                | Standard<br>yes/no |
