3.06 Reportgenerator "ReportMaker" (continued 1)

Generate Reports:

The ReportMaker offers a variety of formats as output options.

The option "VIEW" ...

... creates the report directly in the application ...

... manager and project manager is assigned. All the other groups (with the exception of the owners)

do not have access to this report.

Note: The change of the authorization is only active after saving the document.

Actions in the ReportDesigner

The report includes five actions. The actions "Display preview" and "Display preview in different format" create a report directly from the designer, if the designer is accessed from a result list. The action "create default report" sets your own report back to the original configuration (it lists all the elements of the document) and the action "Display available reports" displays all reports of the selected document type (here employee).

The action "create headers/footers" allows the assigning headers and footers for the generated reports. These elements can include logos, headers and formatting information, and can be currently created exclusively by the owner.
