5.06 Create Order Confirmation

Create

If a customer's order has to be stored in the system (for example in partial order) an order confirmation can be created by using the function "Create" in the intro screen or through the last offer version. The information of the order confirmation (order value, order number, order date) will be transferred to the order tab of the project.

An order confirmation can be created either through the navigation bar above the form or through an offer when a (partially) project order has been accepted:

The screenshot shows a software interface for managing offers. The main window is titled "Offer TLC-09-10-15". Below the title bar is a navigation bar with icons for document, edit, view, back references, and actions. The "Actions" menu is open, showing a list of options: Include, Workflow, Edit, Printing, and ExtendValidity. The "Workflow" option is selected, and a sub-menu is displayed with the following items: 05 - Cancel offer, 05 - Finalise offer, 07 - Delete offer, 08 - New offer out of cancellation, 09 - New invoice out of offer, 10 - Remove link to original offer, and 13 - New Confirmation. The "13 - New Confirmation" option is highlighted with a mouse cursor. The main form area displays the "Master data" tab with the following fields: Offernumber (TLC-09-10-15), Project (3 Introduction Projectile), Amount (8.500,00 EUR), Value added tax (VAT-GB-15), Offer total (9.775,00 EUR), OfferCreator (Conner Jane), and Offer date (16.10.2009). The "Valid until date" field is set to 30.10.2009.
